## THE NEW NON-TOXIC, FAMILY-FRIENDLY POWER CLEANER

> Clean chemical free > Kill harmful bacteria\* > Protect the ones you love

Introducing the ionator HOM™, a new family-friendly appliance that uses ionizing technology to convert tap water into a safe, effective cleaner and sanitizer.

When used as directed, the ionator HOM has been tested and proven to kill harmful bacteria, as well as the 2009 Pandemic H1N1 Influenza A virus.

We've taken the same advanced, expensive technology that's been used for years to clean hospitals and restaurants and miniaturized it for affordable, everyday use.

As the ionator HOM organizes and simplifies cleaning — eliminating all the messy, dangerous bottles of chemicals under your sink — some call it “the smartphone of cleaners.”

Best of all, with just the ionator HOM and a faucet, you have a virtually endless supply of safe, sustainable cleaner. So safe, in fact, even kids can use it — learning good cleaning habits along the way.

Stop the repeat purchases of harmful cleaners and make the next generation wonder why we ever used chemicals to clean!

**CHARGE IT UP,  
FILL IT UP,  
CLEAN IT UP!**

Activeion Cleaning Solutions, LLC | 866.950.4667 | [activeion.com](http://activeion.com)

\*When used as directed, kills 99.9 percent of harmful bacteria, also including the 2009 Pandemic H1N1 Influenza A Virus.
