**ACTIVEION CLEANING SOLUTIONS, LLC,
JOINS NATIONAL HEALTH ORGANIZATION
SUPPORTING ENVIRONMENTAL PRACTICES**

ROGERS, MINN. — May 19, 2009 — Activeion Cleaning Solutions, LLC, is pleased to announce that it has increased its commitment to environmental sustainability by joining Practice Greenhealth, a membership organization for institutions and businesses in the healthcare field who are engaged in reducing their environmental footprints.

Practice Greenhealth provides practical guidance, training, consultation and business solutions to help its members in their efforts to implement environmentally responsible practices. More than 800 healthcare providers have joined Practice Greenhealth in the last year alone, indicating the growing commitment among the healthcare community to reduce its environmental impact.

“We are committed to reducing the carbon footprint of the cleaning industry,” says Todd

Schaeffer, vice president and general manager, Activeion Cleaning Solutions. “Our product, the Activeion Pro, uses a revolutionary technology that transforms tap water into a powerful, general-purpose cleaner, freeing the environment from harmful chemical-based cleaning products. It is ideal for use on surfaces including glass, stainless steel, carpet and natural stone. The Activeion Pro is helping cleaning professionals deliver a safer, greener, more profitable solution for their customers. For those who want to make a tangible difference in their approach to environmental stewardship, Activeion offers a true solution.”

The Activeion Pro even sanitizes, when used as directed. Independent third-party certified lab testing shows the Activeion Pro provides for a clean and sanitary surface, with a greater than 99.9 percent reduction of organisms, including E. coli, staph, MRSA, listeria and salmonella from nonporous hard surfaces. When compared to cleaning with traditional chemical detergents, the Activeion Pro delivers a greater than 97 percent benefit across seven key indicators tied to environmental sustainability. A study, coauthored by the University of Tennessee and EcoForm, concluded that converting to just one Activeion Pro for general-purpose cleaning in commercial applications is equivalent to saving 93 gallons of gasoline and two barrels of oil. “We are very pleased to welcome Activeion Cleaning Solutions to the Practice Greenhealth member community,” says Robert Jarboe, executive director, Practice Greenhealth. “Activeion’s membership demonstrates a real commitment to improving the environmental impact of healthcare facilities for patients, staff and communities.”

Practice Greenhealth is the nation’s leading membership and networking organization for institutions in the healthcare community that have made a commitment to sustainable, eco-friendly practices. Members include hospitals, healthcare systems, businesses and other stakeholders engaged in the greening of healthcare to improve the health of patients, staff and the environment. Practice Greenhealth offers a variety of programs to its members, including the

Healthcare Clean Energy Exchange, environmental purchasing, sustainable operations, continuing education, webinars, networking opportunities, communications and annual awards recognizing the achievements of member institutions. For more, visit www.practicegreenhealth.org.

Activeion Cleaning Solutions, LLC, headquartered in Rogers, Minn., is a privately held cleaning technology company created to revolutionize the cleaning industry through the manufacturing, marketing and distribution of advanced cleaning technologies and products. Addressing the ever-growing need for sustainable cleaning, Activeion's solutions are ideal for offices, hotels, hospitals, schools and private residences.
